

BENIKAM SRIKAR

SOFTWARE ENGINEER

benikamsrikar06@gmail.com | GitHub | LinkedIn

SUMMARY

Backend Engineer skilled in designing scalable systems, REST APIs, and real-time applications using Node.js and Python. Experienced in WebRTC-based communication, event-driven architectures, and AI-integrated systems.

SKILLS

Languages: JavaScript, TypeScript, Python, C++

Backend: Node.js, Express, REST APIs, PostgreSQL, MongoDB

Frontend: React, Next.js, Tailwind CSS

AI/ML: PyTorch, TensorFlow

Tools: Git, Docker, AWS, Supabase, WebRTC, Cloud Computing

Soft Skills: Problem Solving, Team Collaboration, Communication, Adaptability

EDUCATION

B.Tech in Computer Science

2027

Sasi Institute of Technology and Engineering

CGPA: 8.45/10

Intermediate (MPC)

2024

Narayana Junior College | 84.5%

SSC (Class 10)

2022

Queens International School | CGPA: 9.9

PROJECTS

Library Space Utilization Analytics System

System Designer / Team

Real-time AI-powered digital twin system for monitoring and optimizing library occupancy.

- Engineered real-time dashboards processing continuous sensor data streams for occupancy tracking
- Designed heatmap-based visualization system to analyze usage patterns and spatial distribution
- Developed intelligent room recommendation system to improve space allocation efficiency
- Built responsive UI enabling dynamic updates and real-time administrative alerts
- Optimized frontend rendering for continuous data updates, ensuring smooth performance under frequent state changes

SWIFT (Secure Wideband Instant File Transfer)

Solo Project

Real-time peer-to-peer file transfer system using WebRTC and event-driven architecture.

- Engineered low-latency P2P communication using WebRTC, reducing server dependency by 90%
- Designed scalable signaling system with Socket.IO for concurrent room-based connections
- Implemented OAuth 2.0 authentication with role-based access (host approval model)
- Implemented file validation layer restricting video transfers to 50MB and .mp4 format, rejecting unsupported formats to ensure controlled and secure data exchange

ACTIVITIES

- Participated in Google and AMD Hackathons (Hack2Skill platform)
- Competed in Internal Hackathon and presented technical paper at Anveshna TechnoCultural Fest

CERTIFICATIONS

OCI AI Foundations

Linux Shell (Coursera)

Software Engineering (Coursera)

OCI Generative AI

Backend Databases (Coursera)
